

Lighting up Nigerians' lives through mobile power

Connecting the dots between the cell phones and solar energy, MTN and Lumos have expanded their offering of a mobile payment electricity service in Katsina state, Nigeria...

The system includes a large solar panel linked to an indoor storage unit that allows customers to access on-demand, power. The service is provided on a lease-to-own basis, and the cost is spread over a five-year term, payable in affordable payments via mobile phone from an MTN airtime account.

Marketed as MTN Mobile Electricity, and available at MTN stores, the [MTN-Lumos Smart Solar Solution](#) helps Nigerian households and small businesses to replace expensive, dangerous and noisy generators as well as candles and flashlights with modern solar electricity that can power DC electronic devices such as LED lights, cellphones, fans, computers and TVs.
