

# LTE Africa agenda finalised

Brand new to the LTE World Series, LTE Africa on 9-10 July 2013 in Cape Town, South Africa, will feature the strategic and commercial aspects of bringing LTE to the market as well as assessing the technical challenges. The full agenda has now been finalised and is available to download.

The event will also highlight the success and failures of active deployments and showcase the future plans of operators to upgrade their networks to LTE (long-term evolution).

LTE is rapidly gaining momentum in Africa and is set to drive broadband penetration in the world's fastest growing internet market. LTE Africa 2013 will be the premier forum for African operators to meet, learn, and form crucial business partnerships and for attendees to analyse the impact of future spectrum announcements and devices for these bands, as well as what is needed in order to stay ahead of the game.

The data market in Africa is forecast to see double-digit growth, and as competition intensifies amongst operators on the continent it has never been more important to be ahead.

Receiving support from the African mobile broadband industry with 3GPP confirmed as strategic partner and Smile Communications as official operator partner; LTE Africa will be the premier forum for African operators to meet, learn, and form fundamental business partnerships to establish what the future holds for LTE across Africa.

With 300+ attendees, 60+ leading speakers including 30+ operator case studies and 60% operator attendance expected, you can't afford to miss out on the opportunity to get a head start in this prosperous market.

The full agenda for Africa's dedicated LTE event has been finalised and the conference brochure is now [available to download](#).
