

Orange Business Services, BlueTide Communications join forces

Orange Business Services and BlueTide Communications have entered a maritime communications collaboration. Orange's global satellite network combined with BlueTide's maritime solutions are set to provide navigation, cybersecurity, voice and video, corporate applications, and asset management for vessels in the workboat industry.

Orange's managed global Ku band VSAT capacity will assist BlueTide with the ability to switch to alternative satellite beams for global coverage. The satellite network will ensure consistent coverage in remote regions and high-quality communications for voice, video, and data.
