

Six accolades for Nokia at the iF Design Awards

HMD Global has announced that six of its Nokia phone devices have been recognised for outstanding design by the iF Design Awards 2020. The awards are held by the world's oldest independent design organisation, iF International Forum Design GmbH.

The Nokia phone devices that were honoured at this year's awards are two smartphones, Nokia 7.2 and Nokia 1 Plus, and four feature phones, Nokia 105, Nokia 110, Nokia 800 Tough and Nokia 2720 Flip. These award-winning devices were selected by a judging panel consisting of 78 independent design experts who reviewed over 7,000 entries from 56 countries across the globe.
