

# Crystal Castles announced for Synergy Live

The headline act band for Synergy Live 2015 is to be the Canadian electronic duo Crystal Castles, who will play on the Red Bull Main Stage on Saturday, 28 November.

Fusing low-res electronic noise and pop hooks so effortlessly that it can seem accidental, Crystal Castles began as producer/multi-instrumentalist Ethan Kath's solo project in late 2003. In 2006 Crystal Castles worked on their own songs and also remixed songs for Klaxons as well as GoodBooks, Uffie and Bloc Party.

In 2008 they released their eponymous debut album, which reached number six on the US Top Electronic album charts. Crystal Castles returned in 2010 with another eponymous album and toured all the big festivals. The band's third album, 'III', featured the singles 'Plague', 'Wrath Of God', and 'Sad Eyes', all of which were instant hits.

Crystal Castles fourth album will follow in 2016 and include new singles 'Frail' and 'Deicide'.
