

Monsanto internship call for entry

Application for Monsanto's year-long internship programme is now open for entry to recent graduates or final year students in the fields of Agriculture, Crop Protection, Horticulture, and related disciplines, based on their academic performance.

Current Monsanto interns, Bonolo Molewa and Lutholwethu Khumalo.

According to Madeleine du Plessis, human resource generalist at Monsanto SA, the internship is a great opportunity to gain practical experience because candidates do hands-on work while learning about the industry.

“From the first day our interns become contributing members of the team with meaningful responsibilities. This allows them to have a realistic look at a career with Monsanto. They gain valuable professional experience and developmental input,” said du Plessis.

Following a rigorous assessment, successful applicants will have the opportunity to be part of the company and will be based at the Johannesburg head office, where they will benefit from the mentorship of the Monsanto Leadership team.

All interested parties can apply for the internship online on the [Monsanto LinkedIn page](#)
