

# Viacom to expand its distribution across Africa and Europe

Viacom International Media Networks is once again expanding its distribution across Europe and Africa. The media company announced new distributions deals with key multiplatform players abroad. New partnerships include the launch of MTN in Africa, MTV+ Prime Video Channel in Germany and Austria and SVOD deals with Vodafone in Turkey.

The partnership in Africa will be between MTN and Arial View Nigeria Limited, they will launch several global brands including Nickelodeon, MTV, MTV Base and Comedy Central on MTN's Shortz streaming platform for Nigerian subscribers.

Consistent with consumer trends in Sub-Saharan Africa that demand increased bite-size content, the new deal positions Viacom as a prominent player in long-term saturation in the region. AVNL will distribute and monetise licensed Viacom content to MTN, Africa's largest mobile network operator. It has more than 200 million subscribers, with 57 million in Nigeria alone.

"We are pursuing a diversified and extensive multiplatform strategy," said Raffaele Anecchino, president and MD of Viacom's Southern and Western Europe, Middle East and Africa business cluster.

"We are a company that produces premium longform and short form content for every platform," she continued.

"We are excited to be working with great partners like Amazon in Germany, MTN in Africa and Vodafone, as we continue evaluate each market for new opportunities and unlock value through both traditional and non-traditional distribution partners."

The MTV+ Prime Video channel now offers 24-hour music video programming, as well as numerous reality show hits, including *Jersey Shore: Family Vacation*, *Fear Factor*, *Catfish: The TV Show* and *Just Tattoo of Us*, *Teen Mom*, *Geordie Shore* and *Ex on the Beach*.

Subscribers will have exclusive access to new shows before anyone else. They will be the first to see the new season of *Ex on the Beach US*. Viacom plans to grow the library over time.
