

Blackberry just got easier

Vodacom has launched its latest device options to access the BlackBerry communication solution: the Sony Ericsson P910i, the Motorola MPx220 and Siemens SK65. Through Research In Motion's (RIM) licensing programme, Vodacom customers can choose BlackBerry from a greater device choice. Vodacom launched BlackBerry to the South African market in February 2005, revolutionising mobile communication for many individual and business customers.
