

Assess quality of articles on Wikipedia

Mashable reports that there is now a new algorithm, developed by Xiangju Qin and Pádraig Cunningham at University College Dublin in Ireland, that assesses the quality of Wikipedia articles

For more:

- Mashable: [New algorithm assesses the quality of Wikipedia articles...](#) The report states that algorithm "assesses the quality of Wikipedia pages based on the authoritativeness of the editors involved and longevity of the edits they have made". According to Qin and Cunningham, this algorithm could reassure visitors and help focus editors on entries that need improving.
