

AxisWorkgroup appointed as official distributor for Africa

Authlogics, a provider of multi-factor authentication and transaction verification methods, has appointed AxisWorkgroup as its first local distributor for Africa, delivering authentication solutions to resellers.

As an Authlogics gold partner, AxisWorkgroup will offer resellers account and project management, specialised security skills, national logistics and delivery infrastructure.

The Authlogics authentication solution service reduces the dependency on passwords and improves customer experience by relieving pressure on the helpdesk for password resets, thereby ensuring regulatory compliance and mitigate risks with simple and secure login.
