

LanDynamix enhances partnership with Allem Brothers

The long-standing partnership between Allem Brothers and Lan Dynamix will soon reach its latest milestone with the installation of a fibre-optic connection. Because Allem Brothers is located in Viljoenskroon in the Northern Free State, poor and unreliable connectivity poses an increasingly serious barrier in today's connected business environment.

"The fibre-optic project is a milestone in an ongoing journey to ensure that ICT can provide even better support for the growth strategy of what is a highly complex business," explains Pierre Gerber, IT manager at Allem Brothers. "LanDynamix continues to play a key role in that journey."
