

Goodbye to Freelancers!

All companies should unite and BAN ALL FREELANCERS!!!

We own a medium sized digital/print studio in Johannesburg and have always used the skills of freelancers.

What I have come to realise though is:

- A. Some of them are in the same price range as large corporate businesses i.e. They overcharge!!!
- B. They do not need to pay employers, VAT, and other general expenses
- C. Companies cannot seem to get the really talented designers - because everyone wants to freelance and earn a fortune
- D. They bail out at the last minute and are NOT always reliable.

Are we the only ones that feel this way or are there others that will agree?
