A look at the list reveals that, among other things, South Africans use the internet to find the answer to pressing questions, stay informed on topical issues, connect to government services, keep up with their favourite public figures and look for work, food, entertainment and health-related information.

As Google celebrates the 15th anniversary of Google Trends, here is a look at some of the top Google searches in South Africa over the past 15 years:

Citra soda  
Blood in urine

Search trends information is gleaned from data collated by Google based on what South Africans have been searching for. Google processes more than 40,000 search queries every second. This translates to more than a billion searches per day and 1.2tn searches per year worldwide. 'Top searches' indicate searches that topped Google's charts while 'most searched' queries are the most popular terms for the past 15 years, ranked in order by volume of searches. Live Google search trends data is available [here](#).
