

Navigating Africa

#Africacom: The iconic shape of Africa turned out to be the unsung hero of the recent Africacom and AfricaTech trade events, which took place from 12-14 November, 2019. The twin events saw stakeholders in telecoms, data, technology, connectivity infrastructure, AI, Fintech and IoT converge on Cape Town's CTICC to learn, network and do business.

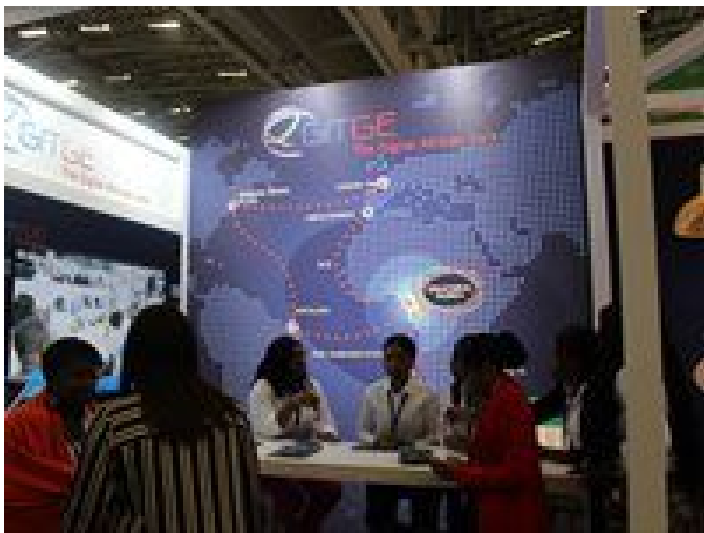

For Bizcommunity photographer Terry Levin, the many variations of the Africa motif seen on the event trade stands emerged as a symbol of the navigation and transformation journeys currently happening for the many global players in the pan-African digital landscape.
