

Uganda Airlines orders two Airbus A330neo aircrafts

Uganda Airlines, the national carrier of Uganda, has firmed up its order for two A330-800 airliners, the latest version of the most popular A330 widebody airliner.

Fitted with the new Airspace by Airbus cabin, the A330neo will bring a range of benefits to Uganda Airlines and its customers, offering unrivalled efficiencies combined with the most modern cabin.

Uganda Airlines plans to use the A330-800 to build its medium and long-haul network with the aircraft offering cutting-edge technology along with more efficient operations.

Launched in July 2014, the A330neo Family is the new generation A330, comprising two versions: the A330-800 and A330-900 sharing 99% commonality. It builds on the proven economics, versatility and reliability of the A330 Family, while reducing fuel consumption by about 25% per seat versus previous generation competitors and increasing range by up to 1,500 nm compared to the majority of A330s in operation.

The A330neo is powered by Rolls-Royce's latest-generation Trent 7000 engines and features a new wing with increased span and new A350 XWB-inspired Sharklets. The cabin provides the comfort of the new Airspace amenities including state-of-the-art passenger inflight entertainment and Wifi connectivity systems, amongst others.
